

Whizometer™

Brand Urinometric Device

OWNERS MANUAL

Batteries must be changed in accordance to the instructions in this manual.

For long service life and proper function, the Whizometer™ brand urinometric device must be maintained according to the following instructions.

Thank you for purchasing the Whizometer™ brand urinometric device. With regular care, your Whizometer will give you long service life and easy operation.

Installation

Make sure that the urinal is clean (for good suction cup attachment)

- Ø For urinals with a vertical (plumb) back wall
Use the four short suction cups.
- Ø For urinals with a slanted (off-plumb) rear wall
Use the two short suction cups and two long ones.
- Ø Slide the suction cups into slots on the back of the whizometer
- Ø Stick the Whizometer to the back of the urinal, the whizometer turbine should be about 28 inches off the floor but ensure that the bottom of the unit is above the water level when flushing the urinal.

Cleaning

For proper function the device must be cleaned daily. The key to cleaning the device is to apply the cleaning solution into the rotating turbine area. After applying the cleaning solution, it is important that the device be rinsed with clean water to avoid buildup of the cleaning solution.

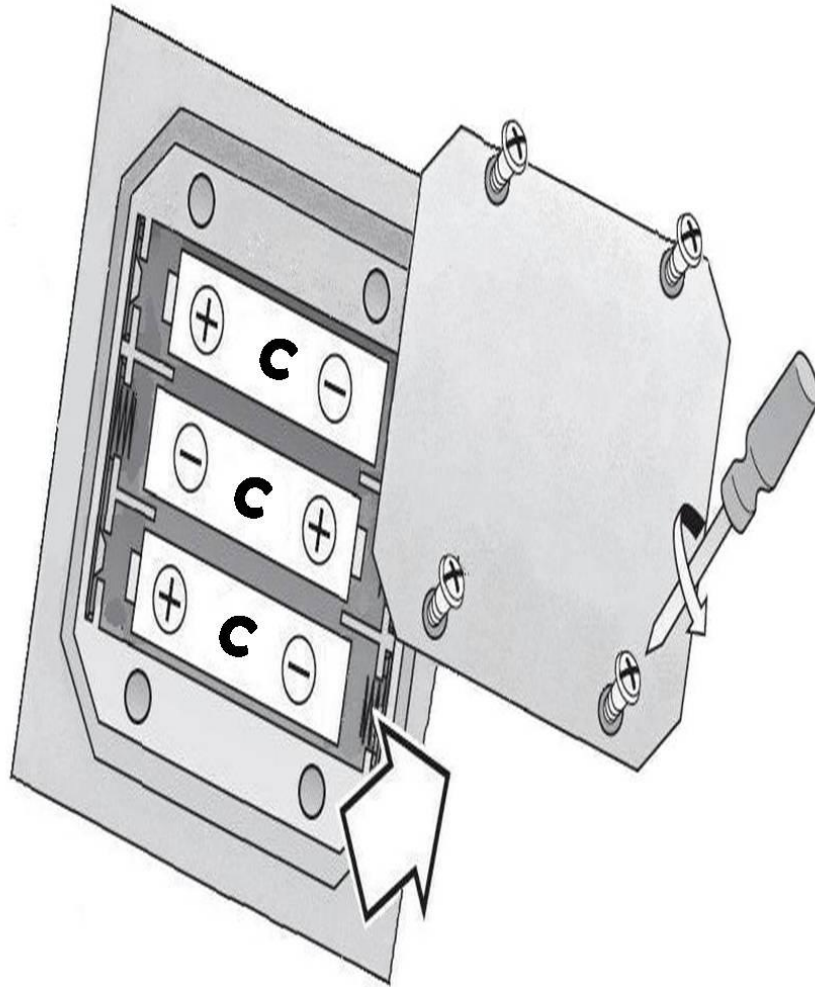

Batteries

TO ENSURE PROPER FUNCTION:

- Do not mix old and new batteries.
- Do not mix alkaline, standard or rechargeable batteries.
- Battery installation should be done by adult.
- Non-rechargeable batteries are not to be recharged.
- Rechargeable batteries are to be removed from the Whizometer before being charged.
- Rechargeable batteries are only to be charged under adult supervision.
- Only batteries of the same or equivalent type as recommended are to be used.
- Batteries are to be inserted with the correct polarity.
- Exhausted batteries are to be removed from the Whizometer .
- The supply terminals are not to be short-circuited.

TO INSERT OR REPLACE BATTERIES:

This whizometer requires 3 "C" batteries (not included) for operation. Unscrew the battery door and remove the back cover from the whizometer. Install/replace with 3 x "C" batteries. Replace the door and gently snug the screws tight. Installation of batteries should be done by an adult.

Questions about Whizometer™
